II. HAZARDS IDENTIFICATION

**Acute Health Effects:**
- **Routes of Entry:** Skin contact, Inhalation, Ingestion, Eye contact
- **Target Organs:** No organs known to be damaged from exposure to this product.
- **Inhalation:** Breathing oil mist in concentrations that exceed the TLV and PEL may result in respiratory discomfort and irritation.
- **Skin Contact:** Can cause minor skin irritation, defatting, and dermatitis.
- **Skin Absorption:** No absorption hazard in normal industrial use.
- **Eye Contact:** No hazard in normal industrial use.
- **Ingestion:** Although this product has a low order of acute oral toxicity, aspiration of minute amounts into the lungs during ingestion or vomiting may cause mild to severe pulmonary injury and possibly death.

**Chronic Health Effects:**
- **Carcinogenicity:** Not expected to cause cancer. This product meets the IP-346 criteria of <3% PAH's and is not considered a carcinogen by the International Agency for Research on Cancer.
- **Reproductive Toxicity:** No data available to indicate product or any components present at greater than 0.1% may cause birth defects.
- **Mutagenicity:** No data available to indicate product or any components present at greater than 0.1% is mutagenic or genotoxic.

**Potential Health Effects:** See Section 11 for more information.

**Medical Conditions Aggravated by Exposure:** Personnel with pre-existing skin disorders should avoid contact with this product.

</tbody>
</table>

Components not listed are not physical or health hazards as defined in 29 CFR 1910.1200 (Hazard Communication Standard).

IV. FIRST-AID MEASURES

**Inhalation:** Remove to fresh air. If breathing is difficult, have a trained individual administer oxygen.

**Eye Contact:** None expected to be needed, however, use an eye wash to remove a chemical from your eye regardless of the level of hazard.

**Skin Contact:** Wash with soap and water. Get medical attention if irritation develops or persists. Seek
Ingestion:
Minimal risk of harm if swallowed. Do not induce vomiting. Seek medical attention immediately. Provide medical care provider with this SDS.

Notes to Doctor:
Aspiration during swallowing or vomiting may severely damage the lungs. If evacuation of stomach contents is necessary, use method least likely to cause aspiration.

V. FIRE FIGHTING MEASURES

Flammability: Combustible at elevated temperatures
Extinguishing Media: Use alcohol resistant foam, carbon dioxide, or dry chemical when fighting fires. Water or foam may cause frothing if liquid is burning but it still may be a useful extinguishing agent if carefully applied to the surface of the fire. Do not direct a stream of water into the hot burning liquid.

Fire and/or Explosion Hazards: Material may be ignited only if preheated to temperatures above the high flash point, for example in a fire.
Fire Fighting Methods and Protection: Do not enter fire area without proper protection including self-contained breathing apparatus and full protective equipment. Use methods for the surrounding fire.
Hazardous Combustion Products: Carbon monoxide, Smoke

VI. ACCIDENTAL RELEASE MEASURES

Personal Precautions and Equipment: No health affects expected from the clean up of this material if contact can be avoided. Follow personal protective equipment recommendations found in Section 8 of this SDS.
Methods for Cleanup: Prevent the spread of any spill to minimize harm to human health and the environment if safe to do so. Wear complete and proper personal protective equipment following the recommendation of Section 8 at a minimum. Dike with suitable absorbent material like granulated clay. Dispose of according to Federal, State, Local, or Provincial regulations. Used fluid should be disposed of at a recycling center. Remove from water surface by skimming or with suitable absorbents. Do not use dispersants. Avoid runoff into storm sewers and ditches that lead to waterways. Do not flush to sewer.

VII. HANDLING AND STORAGE

Handling: Mildly irritating material. Avoid unnecessary exposure.
Storage: Store in a cool dry place. Isolate from incompatible materials.

VIII. EXPOSURE CONTROLS/PERSONAL PROTECTION

Engineering Controls: Use local exhaust ventilation or other engineering controls to minimize exposures and maintain operator comfort.
Respiratory Protection: Respiratory protection may be required to avoid overexposure when handling this product. General or local exhaust ventilation is the preferred means of protection. Use a respirator if general room ventilation is not available or sufficient to eliminate symptoms.
Respirator Type(s): None required where adequate ventilation is provided. If airborne concentrations are above the applicable exposure limits, use NIOSH/MSHA approved respiratory protection.

Eye/Face Protection: No special requirements under normal industrial use.
Skin Protection: Where use can result in skin contact, practice good personal hygiene and wear impervious gloves. Wash hands and other exposed areas with mild soap and water before eating, drinking, and when leaving work.
Gloves: Neoprene, Nitrile

IX. PHYSICAL AND CHEMICAL PROPERTIES

Physical State: Liquid
Colour: Red
Odour: Mild
pH: Not determined
Viscosity (cSt at 40°C): 28.56
Solubility: Negligible; 0-1%
Water/Oil Partition Coefficient: Not determined
Evaporation Rate: Not determined
Vapor Density: Not determined
Vapor Pressure: <0.20
Boiling Point (°C): Not determined
Freezing Point (°C): Not determined
Specific Gravity: 0.85
Bulk Density: 7.07 Lbs/Gallon

X. STABILITY AND REACTIVITY

Stability: Stable under normal conditions.
Conditions to Avoid: Temperatures above the high flash point of this combustible material in combination with sparks, open flames, or other sources of ignition. Moisture (will lead to product performance degradation).
Materials to Avoid: Strong oxidizing agents
Hazardous Decomposition Products: Carbon monoxide, Smoke

XI. TOXICOLOGICAL INFORMATION

Routes of Entry: Skin contact, Inhalation, Ingestion, Eye contact
Ingestion: No hazard in normal industrial use.
Inhalation: No hazard in normal industrial use.
Absorption: No absorption hazard in normal industrial use.
Eye: Upon prolonged or repeated contact, no hazard in normal industrial use.
Skin: Upon prolonged or repeated contact, can cause minor skin irritation, defatting, and dermatitis.

Chemical Name | LD₅₀ and LC₅₀ |
---|---|
Distillates (petroleum), hydrotreated light paraffinic | Inhalation LC50 Rat 3900 mg/m³ 4 h (Source: NLM_CIP) |
Highly refined synthetic base stocks | Inhalation LC50 Rat 2.18 mg/L 4 h; Oral LD50 Rat >2000 mg/kg; Dermal LD50 Rabbit >2000 mg/kg |
Distillates (petroleum), hydrotreated heavy paraffinic | Inhalation LC50 Rat 2.18 mg/L 4 h; Oral LD50 Rat >2000 mg/kg; Dermal LD50 Rabbit >2000 mg/kg |

Carcinogenicity: Not expected to cause cancer. This product meets the IP-346 criteria of <3% PAH's and is not considered a carcinogen by the International Agency for Research on Cancer.
Mutagenicity: No data available to indicate product or any components present at greater than 0.1% is
Safety Data Sheet

Reproductive Toxicity: Not known or reported to cause reproductive or developmental toxicity.

Skin Sensitization: No data available to indicate product or components may be a skin sensitizer.

XII. ECOLOGICAL INFORMATION

Overview: Slight ecological hazard. In high concentrations, this product may be dangerous to plants and/or wildlife.

Mobility: This material is expected to have essentially no mobility in soil. It absorbs strongly to most soil types.

Persistence: Biodegradation, adsorption to sediment, and bioconcentration to aquatic organisms should not be significant.

Bioconcentration: Bioconcentration may occur.

Degradability: Biodegrades slowly.

XIII. DISPOSAL CONSIDERATIONS

Disposal of Packaging: Recycle containers whenever possible.

Disposal Methods: Dispose of according to Federal, State, Local, or Provincial regulations. Recycle used oil.

XIV. TRANSPORTATION INFORMATION

Not classified as hazardous for transport (DOT, TDG, IMO/IMDG, IATA/ICAO).
